

**ROHRHANDEL-
BRUNZEL GMBH**

SEAMLESS STEEL PIPE WHOLESALERS

Reliably serving customers for more than 45 years

A TRADITIONAL FIRM WITH PASSION AND EXPERTISE

Located in the heart of Düsseldorf's harbour district, this family-owned company has been serving customers for more than 45 years. Company founder Günter Brunzel laid the foundations for the firm's later success in the early 60s, establishing extensive business links throughout Europe. From the very beginning, the company has been dedicated to fostering customer relationships and it has constantly extended its range of services. And the family tradition remains strong – both of the founder's sons have been active in the company since the 90s and now hold managerial positions. The workforce has also been expanded, and now consists of more than 35 well-qualified employees. All of this adds up to a healthy medium-sized company which will continue to serve you, its customers, well into the future.

WORKING HAND IN HAND WITH YOU

This long and successful company history is testimony to our high level of expertise, flexibility and – above all – our continuous level of professionalism. We are one of the largest privately owned steel pipe wholesalers in Germany and primarily supply trade customers. Please allow us to briefly introduce ourselves.

TRANSPORTATION AND TECHNOLOGY

We operate warehouses with an area of approx. 6,000 m², plus an additional 5,000 m² of outdoor storage space. In addition to this, we maintain several forwarding warehouses, enabling us to react flexibly to capacity peaks. And by ensuring that our storage facilities, crane systems and saws are always kept up to date, we are capable of providing optimal warehousing services.

All of our warehouses are also equipped with a number of self-contained HGV loading bays. This means that your collection orders are processed quickly and flexibly. And thanks to our own private

sidings, we are also able to deliver or collect goods using the rail network.

STATE-OF-THE-ART IT

We keep our computer systems constantly up to date, allowing us to consistently offer our clients the very best service. Thanks to our modern IT system, we are able to keep close track of bespoke lengths, and can also immediately identify the supplier and the relevant certificates (test certificate WZ 2.2/ inspection certificate APZ 3.1.B). This allows our sales staff to process queries and orders quickly and flexibly.

THE IN-STOCK RANGE

Our ever-growing in-stock range currently comprises more than 10,000 tonnes, offering a variety that meets even the highest customer expectations.

Standard and thick-walled seamless steel pipes with external diameters of 10,2 to 660 mm in the following steel grades:

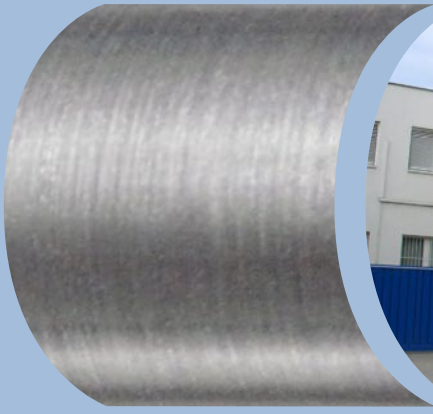

- S355J2H/EN 10210-1
- E355 + AR/EN 10297
- St 52.0, St 52.4/DIN 1629/1630
- P235TR2/EN 10216-1
- Seamless threaded pipes complying with DIN 2440/2441 or EN 10255 in black

For orders involving special surface finishing requirements, we can call on the services of a number of local processing companies – even at short notice. This enables us to handle your orders quickly and easily.

MAXIMUM RELIABILITY OF SUPPLY FOR A GREAT RANGE OF TOP-QUALITY PIPES

Excellent industry contacts and partnerships around the world help us to ensure that our warehouse is always comprehensively stocked. We cater for market requirements by carrying all dimensions and wall thicknesses. And in the unlikely event of a shortfall, our buyers can acquire additional material at short notice if necessary. Our large saw capacities ensure that we can fulfil orders for specific lengths quickly and reliably. **Four modern bandsaws are always available for external diameters of up to 660 mm, allowing us to supply even the shortest specific lengths – quickly and in large quantities.**

CONTACT INFORMATION

Why not contact us to find out what we can do for you? Or arrange a visit to our warehouse facility and experience our professional operation for yourself. You can find more information and contact details on our website.
